# ExxonMobil HD 8760

## Rotational Molding HDPE

# ExonMobil Chemical

#### **Material Description**

HD 8760 is a high density hexene copolymer designed to offer outstanding stiffness and processability. This resin is ideally suited for applications that require the optimum balance of stiffness, processability and surface appearance.

HD 8760.29 Pellet Form; Long term UV8 stabilization

HDP8760.29 35 US Mesh Powder; Long term UV8 stabilization

#### **Typical Applications**

✓ RV tanks

- Values given are typical and should not be interpreted as specifications. Values may change with future development.
- All physical properties were measured on rotomolded samples, except for ESCR, which was measured on compression molded samples.
- Tensile testing was conducted at a crosshead speed of 50 mm/min. The tensile strength reported refers to the maximum stress reached during the test.
- ASTM test procedures may be modified to accommodate operating conditions or facility limitations.
   Grades have NSF and UL recognition. Contact your ExxonMobil representative for details.
